

Shivani Matta

React Lead/Technical Architect

 Reading, UK  shivanimatta30@gmail.com  +44 7887302840

Professional Summary:

Highly skilled and motivated Technical Architect and Frontend/React Technical Lead with 14+ years of experience designing and developing scalable, high-performance web applications. Proven expertise in building **low-latency applications** that deliver seamless, real-time user experiences for business-critical operations.

Extensive experience in developing React applications from scratch and creating end to end technical solution. Experience in creating **low-level technical** design documents and **architectural diagrams** for a project. Depth knowledge and hands-on experience in **IAM solutioning in Azure** (B2B, B2C, Entra ID), **React, Redux** and Redux Toolkit along with building responsive reusable UI components to interact with AEM. Depth knowledge on creating React redux framework along with Accessibility features. Well-versed in JavaScript, TypeScript, jQuery, HTML & CSS. Hands-on experience in deployment on UCD and IIS serves.

Recent Work Experience:

TATA Consultancy Service

Duration: August 2025 – Till date
Client: Whitbread Plc.

Location: UK – London
Role: Technical Lead

Brief Description:

Whitbread is a British multinational company specializing in hotels and restaurants, best known for its Premier Inn hotels and various restaurant brands. Designed and developed an application for their staff for Task management which includes creating master configurations, creating tasks for different site locations using Task builder and dynamically populating the tasks from task builder, RBAC etc.

Responsibilities:

- Led development of large-scale **React** and **React Native** applications with modular, maintainable architecture and high performance.
- Designed and implemented **RBAC frameworks** ensuring secure, permission-driven user experiences.
- Ensure **scalability, low latency, and high availability** in UI and API integrations
- Delivered **fully responsive** UI across web and mobile, aligned with modern design systems.
- Mentored developers to implement **low-latency UI patterns** (lazy loading, memoization, state optimization, API throttling)
- Work on high-frequency user interaction flows with **minimal response time**
- Implemented **WCAG-compliant accessibility** features including keyboard navigation, ARIA roles, and screen-reader support.
- Built **dynamic form-builder engines** enabling configurable forms, conditional logic, and schema-driven rendering.
- Create and maintain **architecture diagrams, design documents, and technical specifications**.
- Present architecture **diagrams and design documents to client** for approval.
- Define the overall technical vision and architecture for the project.
- Mentored developers, conducted code reviews, and established best practices for performance, testing, and CI/CD.
- Collaborated with product owner, UX, and development teams to deliver high-quality features.

- Support development teams throughout implementation and troubleshooting.

Technologies/Tools Used:

- Architecture modelling tools: Microsoft Visio, Draw.io
- Collaboration tools: Azure
- Database: Azure SQL DB, Portal SQL DB
- Frontend: React, Redux, React Native, HTML, Tailwind
- Backend: Dot net
- CI/CD: Azure Pipelines, Jenkins
- IAM: Azure
- Azure API Management

Duration: April 2024 – August 2025

Client: Financial Ombudsman Service

Location: UK – London

Role: Technical Architect

Brief Description:

The Financial Ombudsman Service is a service that settles complaints between consumers and businesses that provide financial services. They have 2 portals one for financial businesses to maintain their cases and other for complainant users.

Responsibilities:

- Create and maintain **architecture diagrams, design documents, and technical specifications** for scalable and high-performance application.
- Create end to end **IAM** solution in **Azure AD B2B, Azure AD B2C and Entra ID**.
- Present architecture diagrams and design documents to client for approval.
- Create sequence diagrams for every feature to define technical flow.
- Analyze and improve **application performance (load time, rendering, API latency)**
- Implement **code-splitting, caching, and performance tuning techniques**
- Guide development team to implement IAM solution in Azure using user flows and custom policies.
- Define usage of Graph API.
- Define the overall technical vision and architecture for the project.
- Build **React components using Redux**.
- Support development teams (frontend, backend and azure) throughout implementation and troubleshooting.
- Designed and **optimized UI for real-time, high-frequency** user interactions with minimal latency

Technologies/Tools Used:

- Architecture modelling tools: Microsoft Visio, Draw.io
- Collaboration tools: Azure
- Database: Azure SQL DB, Portal SQL DB
- Messaging: Azure Service Bus
- Frontend: React, Redux, HTML, CSS, MUI
- Backend: Java
- CI/CD: Azure Pipelines, Jenkins
- IAM: Azure AD B2B, Azure AD B2C and Entra ID
- Azure API Management, Graph API

Duration: April 2021 – April 2024

Client: Lloyds Banking Group

Location: UK – London

Role: Lead React Developer

Brief Description:

Lloyds Banking Group plc is a British financial institution formed through the acquisition of HBOS by Lloyds TSB in 2009. It is one of the UK's largest financial services organisations. The business operates under a number of distinct brands, including Lloyds Bank, Halifax, Bank of Scotland and Scottish Widows.

Responsibilities:

- Develop and maintain responsive React component along Redux as middleware for store management.
- Responsible for developing cross browser application along with loading the **web view in IOS and Android native apps**.
- Upgraded to Redux toolkit to support more features.
- Designed and **optimized UI for real-time, high-frequency** user interactions with minimal latency
- Implemented **performance optimization techniques** including lazy loading, memoization, and API optimization
- Build reusable independent React library for analytics which can be imported by other journeys.
- Collaborated with cross-functional teams to understand business requirements and translated them into scalable solutions.
- Implement **Accessibility feature** for all the components and journeys.
- Assisted in the solution designing and providing actionable insights for strategic decision-making.
- Upgraded the legacy application and implement with latest React with Redux toolkit.
- Build components to interact with AEM and load dynamic data on UI from AEM.
- Ensures code quality by including SonarQube and React testing library for test coverage.
- Responsible for deployment on UCD and IIS server

Cognizant Technology Solutions

Duration: Jan 2020 to Mar-2021

Client: National Heritage Board

Location: India - Gurgaon

Role: Senior React Developer

Brief Description:

NHB is a Singapore government website to provide teachers to book Museum tour for the students of different class. Teachers after login can book, edit, and cancel the tour. Also, they can book slots for long term in advance. Dashboard is also part of the website which only staff members can access to approve or reject the booking and to set other parameters related to booking.

Responsibilities:

- Worked as Technical Lead and developed React components using Redux thunk as middleware.
- Developed UI components using Reactstrap and coreUI.
- Participated in team meetings and contributed to discussions on solution design and engineering best practices.
- Followed agile project development.
- Used GIT for version controlling.
- Implemented Graph independent library that can be imported by other React applications.

Duration: Mar 2019 to Jan 2020

Location: India - Gurgaon

Client: Etihad Airways

Role: Senior Frontend Developer

Brief Description:

Etihad Airways is one of two flag carriers of the United Arab Emirates and is the second-largest airline in the UAE after Emirates. Etihad Airways website provides their customers to book & cancel flight, coach and can check other information like baggage details for specific origin & destination, umnr, flight details etc. on their website itself.

Responsibilities:

- Worked as Senior developer and developed React application.
- Developed responsive UI components using Bootstrap.
- Worked closely with AEM team during integration with React components.
- Followed agile project development.
- Used Tortoise SVN for version controlling.
- Participated in team meetings and contributed to discussions on solution design and engineering best practices.

Duration: Jun-2016 to Mar-2019

Location: India - Gurgaon

Client: Max Life Insurance

Role: Senior Frontend Developer

Brief Description:

Max Life Insurance is a leading life insurance company in India which offers Life insurance plans that includes term insurance, child, retirement, cancer care etc and sells policies on both online and offline channels.

Responsibilities:

- Developed responsive website which propose and sell personalised policies to the customer based on the inputs collected.
- Involved in all the phase starting from Solution Designing, UI Designing, Developing and Testing
- Worked closely with AEM team to integrate UI components.
- Developed components using JavaScript, HTML & LESS.
- Followed agile project development.
- Implemented Accessibility AAA standards to enable speech reader feature.
- Used Tortoise SVN for version controlling.
- Participated in team meetings and contributed to discussions on solution design and engineering best practices.

Education:

- Bachelor of Engineering in Computer Science | First Division | University Name: Kurukshetra University | India

Skills:

- IAM – Azure AD B2B, Azure AD B2C and Entra ID
- Frameworks – React, Redux, Redux Toolkit, Expo, jQuery, Bootstrap, MUI
- Version Control: Git, SVN
- Programming: JavaScript, TypeScript, HTML, CSS
- IDE – Visual Studio Code, Eclipse
- Tools – Draw.io, MS Visio, Photoshop

Full Employment History

- TCS – India/UK
Apr 2021 – Till date
- Cognizant – India – 4 yrs 9 months
June 2016 – Mar 2021:
- Yamaha Motors – India – 2 yrs 2 months
Apr 2014 – June 2016:
- Borderlessminds – India - 1 yr
Apr 2013 – Apr 2014
